Stem Can Type CdS Photoconductive Cells

Alpha-One can supply the high quality photocells with various kinds of resistance according to the needs of each customer, not only the resin-coating type, but also stem can type.

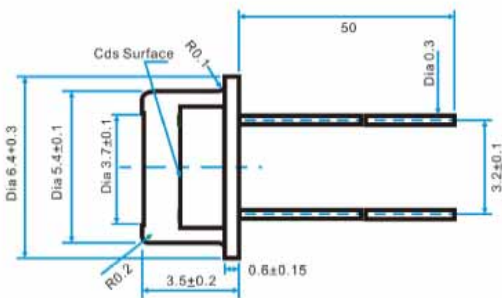

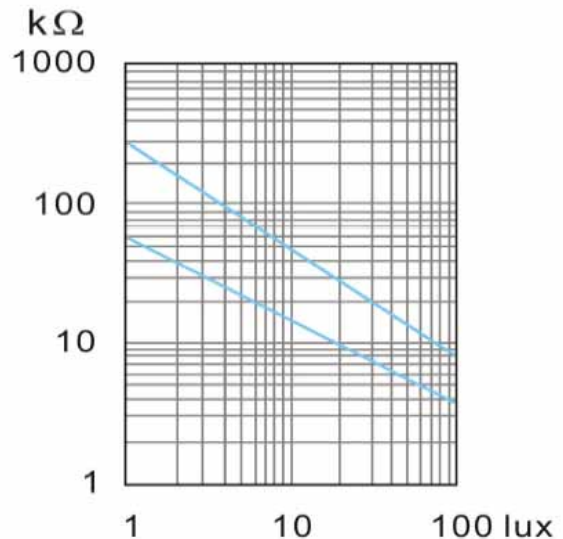

◆ Stem Can Type: GL5-2C01

T_A=25°C

| Max. Voltage applied | Max. Power dissipation | Light Resistance at 10Lux | Dark Resistance | Gamma | Ambient Temperature |
|----------------------|------------------------|---------------------------|-------------------|---------------------|---------------------|
| | | [R ₁₀] | [R _D] | [γ 10/100] | |
| 150VDC | 100mW | 20~40kΩ | Min. 2.0MΩ | 0.7 ^{±0.1} | -30~+70°C |

Luminance VS Photo Resistance

Can Type Photocells with the different range of resistance are available.
